

Drilling School Celle: Energy and Competency to Ensure the Future

The well control courses utilise an up to date, modern drilling simulator. Because the Drilling School Celle is an IWCF accredited assessment centre, every successful candidate according to the subject studied, receives an internationally accepted IWCF Well Control Certificate at the end of the course.

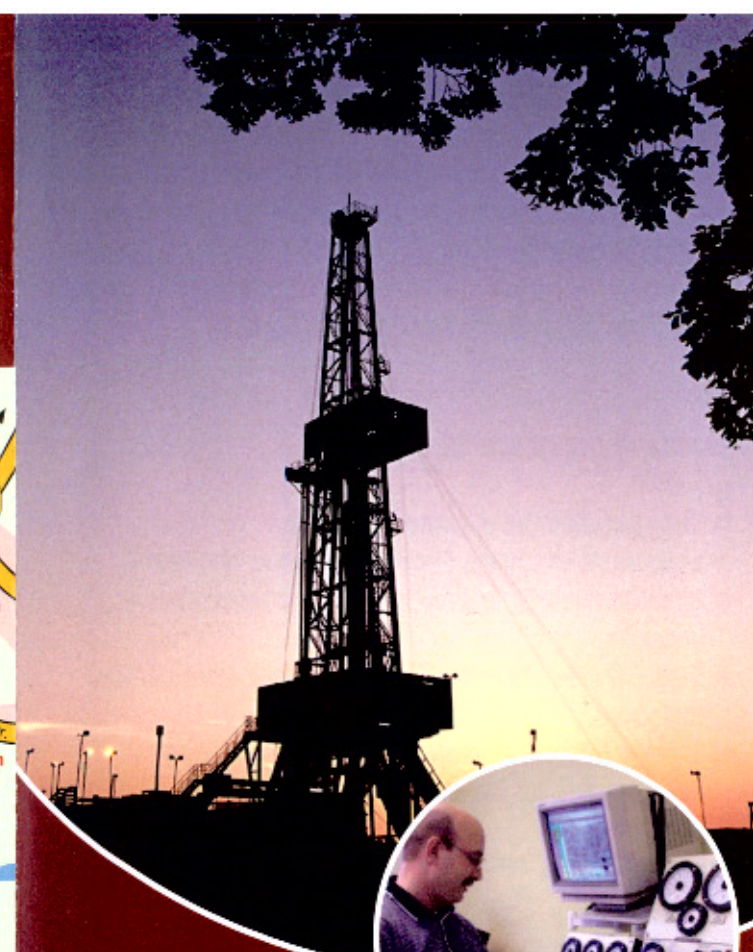

Specialised courses and seminars can also be provided as so called "In House Courses" based on the special needs of the relative business activity and any special wishes of the Client Company or organisation concerned. When necessary for a company or corporation to have their employees instructed in a special program relative to a special subject or theme, the Drilling School Celle is able to plan and organize such a course of instruction in close cooperation and with the endorsement of the company concerned. For specialised courses and seminars, all interests pertinent to German domestic and international overseas areas are taken into account. Whenever necessary, an interpreter will be engaged to provide foreign language assistance.

All courses offered and provided by the Drilling School Celle are related and designed on the basis of actual practical experience and "know how". For this reason, when necessary, outside experienced specialists from the industry, service companies, and authorities are temporarily engaged as co-lecturers to the team of permanent staff lecturers. This ensures a complete and absolute coverage facility for all requirements.

Please do not hesitate to call us if we can be of any assistance to the areas of employee training and further education or see us at our homepage. We are able to provide you with the best possible solution to your training problems! And visit our homepage for further information or news.

Drilling School Celle

Drilling School Celle is a State Certified Technical Academy for Drilling, Oil and Gas Production and Pipeline Transportation Technology. Scope of the institution is to provide a high qualified program of technical and social education for supervisors. All subjects in exploration and production of oil, natural gas and geothermal energy will be instructed. Legal entity is a private association which exists since nearly 75 years.

Training program at a glance:

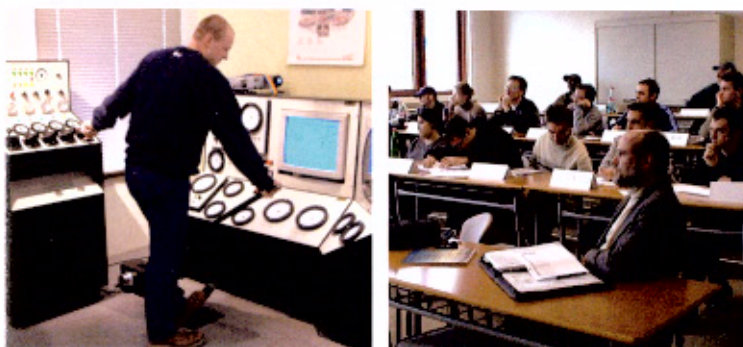

- State Certified Driller course, one year
- State Certified Drilling Supervisor course, two years
- State Certified Oil & Gas Production Foreman course, one year
- State Certified Oil & Gas Production Supervisor course, two years
- Training Course for Blow out Prevention according International Well Control Forum (IWCF)

Members of the supporting organisation:

- BEB Erdgas und Erdöl GmbH (ExxonMobil)
- MOBIL Erdgas-Erdöl GmbH (ExxonMobil)
- GDF SUEZ E & P Deutschland GmbH
- OMV Austria Exploration & Production GmbH
- RWE Dea AG
- Wintershall Holding GmbH
- KCA DEUTAG Drilling GmbH
- ITAG TIEFBOHR GmbH
- Koller Workover & Drilling GmbH
- Hekla Energy GmbH
- H. Anger's Söhne GmbH

- Training Course for Horizontal Directional Drilling according Technical Guidelines of Drilling Contractor Association (DCA) and Regulations according German Association of Gas and Water Technology (DVGW)
- Seminars on Underground Storages of Oil and Gas Technology
- Seminars on Health, Safety and Environmental Issues
- Seminars on Geothermal Energy Exploitation

Today Drilling School Celle is a State Certified Technical School which is directly under the supervision of the Lower Saxonian Ministry of Education as the principal governing body, as well as the Mining Authority of Lower Saxonia (LBEG) serving as the principal supervisory authority.

Seminars and special courses in Drilling-, Production- and Underground Storage Technology; Safety, Environment Protection and Quality Assurance; pertinent Official Regulations; Measuring, Control & Automatic Control Systems; surface Horizontal Drilling Technology due to DCA & DVGW regulations and Deep Geothermal Well Projects.

The specialised courses, seminars and workshops as well as the well control training are available according to requirements in both the German and English languages if required.

The courses for Drillers are provided on a full time basis of 32 hours of tuition per week, and comprise a total of 1280 hours of tuition. The Supervisor courses comprise a total of 2560 hours of tuition.

How it all began

18.08.1937: First training course with 24 participants. The Drilling School Celle was purposely conceived as a single-class school for so-called one-year full-time drilling supervisor training courses.

1942: Provision of advanced drillmaster training courses lasting half a year. Special training courses lasting 3 months were additionally offered for drillers.

1973: The two-stage drilling supervisor training course offered so far was restructured to form a continuous training course modelled on the two-year Technical College curriculum.

1993: Supplementation of further education courses by seminars and special training courses. The Drilling School Celle also offers training courses for personnel who are non-members of the Mining School Association.

1996: The Drilling School in Celle is granted approval to establish a Technical College offering one-year training courses in drilling, oil and gas production and pipeline technology.

The Drilling School in Celle is one of the few Technical Colleges offering one-year as well as two-year training courses.
